

I am writing today in support of my local independent ISP, Sonic.net. This group has been my ISP for nearly 3 years now and during that time has provided a superb, necessary service to me. Despite my always demanding and changing needs they have been responsive to me and have always provided me with a product that I feel would be difficult to replicate with another company. The current petition that is being filed on behalf SBC, if it were accepted, would not enable Sonic.net to continue to provide me with the excellent service I enjoy today. Therefore, I request that you deny the petition and any similar petitions.

Thank you.
